

# Dear guests of the city of Omsk and Omsk region!

In order to provide affordable medical care to patients with diabetes mellitus and other endocrine pathology, since 2017, a **Diabetological center** has been organized and operates in BUZOO "GP № 13".

Doctors-endocrinologists of the center carry out reception of patients with application of laboratory and instrumental researches, appoint treatment according to the established standards of medical care and clinical recommendations, and also participate in training of the patients suffering from diabetes mellitus (school of diabetes).

## Our priority.

1. Human health and life is the highest goal we serve.
2. We are responsible for the quality of medical care, ensure control and timely assessment of treatment results.
3. The provision of medical care is complemented by attentive and trusting attitude to the patient, showing respect for each individual and his family.
4. We welcome the active participation of patients in decisions relating to their health and well-being.

The **diabetological center** is located on the basis of BUZOO "GP № 13" at:

**city of Omsk, Yakovlev street, house 145**  
**phone for inquiries: 8 (3812) 25-12-60.**
